

I CLAIM:

1. A gelatinous cushion comprising:
 - a base member made of fibrous material,
 - a cushioning member attached onto said base member, and
- 5 made of gelatinous material for cushioning purposes, and including an outer peripheral surface formed thereon, and including a plurality of orifices formed therein for cushioning purposes, and an outer covering film applied onto said outer peripheral surface of said cushioning member, to cover said cushioning
- 10 member, and to form a smooth outer surface for said cushioning member.
2. The gelatinous cushion as claimed in claim 1, wherein said base member includes a plurality of perforations formed therein.
3. The gelatinous cushion as claimed in claim 2, wherein said
- 15 base member includes a plurality of fibers secured together to form said perforations thereof.
4. The gelatinous cushion as claimed in claim 3, wherein said base member includes an outer coating applied onto said fibers to secure said fibers together and to form said perforations in said base
- 20 member.
5. The gelatinous cushion as claimed in claim 1, wherein said cushioning member includes a plurality of inner peripheral surfaces formed therein, to define said orifices of said cushioning member respectively.
- 25 6. The gelatinous cushion as claimed in claim 3, wherein said outer covering film is applied onto said inner peripheral surfaces of said cushioning member.
